

## Aluminium / Brass and Bronze balls

### **Aluminium balls**

lighter weight compared to steel balls;  
aluminium balls are mainly used in the electronics industry

### **bronze balls**

high corrosion resistance against water;  
they are used in many types of pumps and valves

### **brass balls**

corrosion Resistant to oil, gasoline, butane, benzene and corrosive chemicals;  
applications in many areas of industrial pumps and valves

**diameter:** according to requirements

**grade:** G100- G1000

ISO 3290 / DIN 5401 / AFBMA
